ADVANCED MANAGEMENT SERVICES

Advanced Management Services (AMS) was opened on 1st May, 1995. The establishment offers full computer training and certificate courses in many computer applications. This training is not just for the executive who may need his/her computer skills upgraded but also for the person who knows absolutely nothing about computers. Our computer courses are presently among the very best in the island. We offer Social Studies, Mathematics, English Language, Accounts, Principles of Business, Office Administration, Information Technology, and E.D.P.M.

Advanced Management Services is presently among the top computer training facilities in Barbados. Group sizes are small with each student having access to his or her own computer. Here at AMS we accept students of all ages. Generally, students must be serious about their studies, ever bearing in mind that they have a goal to achieve. All students who complete their courses successfully receive recognised certificates.

Our aim is to provide efficient, complete and timely service far superior to those being offered around us. We believe that we are well on our way to achieving this. We welcome you to our school.

**We assist our students with job
placements. Visit www.tojnetwork.com.**
